

ADITYA DIWATE

Game Designer | Unreal Engine Specialist |
Animation Content Developer

SKILLS

- 1.Game Design & Level Layout
- 2.Unreal Engine 5 & Blueprints
- 3.3D Animation & Model Designing
- 4.Motion Capture (Mocap) Cleanup
- 5.Python Automation & Scripting
- 6.Environment Design & Lighting
- 7.UI/UX Implementation (UMG)
- 8.QA, Debugging & Optimization
- 9.Version Control (Git/GitHub)

SOFTWARES

- 1.Game Engine: Unreal Engine 5
- 2.3D Modeling & Sculpting:
Blender, ZBrush
- 3.Texturing & Cloth: Substance
3D Painter, Marvelous Designer
- 4.Post-Production: DaVinci
Resolve, Adobe After Effects
- 5.UI & Design: Figma
- 6.Version Control: Git / GitHub

LANGUAGES

English / Hindi / Marathi

PROFILE INFO

Passionate Game Designer and Unreal Engine Specialist with over 6 years of experience in full-cycle development. Expert in bridging the gap between Game Design, Animation Implementation, and Technical Art. Proven track record of designing core gameplay mechanics, level progression, and implementing complex animation systems for open-world and horror genres. Skilled in Blender, Unreal Engine 5, and Marvelous Designer, with a strong focus on technical problem-solving to deliver innovative player experiences.

EXPERIENCES

Industry Collaboration:

- NetEase Games: Contributed to technical testing and quality assurance for AAA titles like Marvel Rivals.
- Independent Studios: Collaborated with various indie studios on asset implementation and game testing, Game Design , Developing.

KEY PROJECTS & GAME DESIGN EXPERIENCE

- **Project: Open World Zombie Survival Game (Commercial Title In Development)**
 - 1.Role: Solo Game Designer & Developer | Engine: Unreal Engine 5
 - 2.Authored comprehensive Game Design Documents (GDDs) to define core mechanics, UI flow, and system architecture, ensuring a clear technical roadmap for development.
 - 3.Game Design: Designed core survival loops including hunger, thirst, and stamina management. Balanced resource scarcity to drive player exploration and risk-taking.
 - 4.Level Design: Created a large-scale open-world island topology. Used environmental storytelling to guide player progression naturally without heavy reliance on UI markers.

5. Combat Design: Balanced enemy AI behaviors and weapon statistics to create a fair but challenging difficulty curve for players.
6. Animation Implementation: Designed and implemented complex Animation Blueprints, utilizing State Machines and Blend Spaces for fluid locomotion and combat transitions.

- **Project: Psychological Horror Title (Commercial Title - In Development)**

1. Role: Solo Game Designer & Developer | Engine: Unreal Engine 5
2. Gameplay Mechanics: Designed puzzle logic and stealth mechanics, focusing on tension-building rather than cheap jump-scares.
3. Pacing & Flow: Scripted narrative events and trigger-based sequences to control the emotional pacing of the gameplay experience.
4. System Design: Architected a modular save/load system and checkpoint logic to ensure player progress is preserved without breaking immersion.

- **Project: Squid Game Survival (Rapid Prototype – Solo Dev in 3 Days)**

1. Role: Solo Game Designer & Developer | Engine: Unreal Engine 5
2. Gameplay Mechanics: Successfully adapted a global pop-culture concept into a functional technical prototype in under 72 hours, engineering four rounds including "Red Light, Green Light" and "Glass Bridge" mechanics.
3. Pacing & Flow: Scripted high-tension narrative triggers and time-restricted logic to replicate the source material's emotional rhythm within a rapid-fire gameplay loop.
4. System Design: Architected a modular "Game Mode" framework to manage distinct rule sets per round and real-time failure automation, demonstrating the ability to move from concept to playable build with extreme speed and managed and design all kind of UI framework including a fully functional main menu.

- **Project: The Hardest Mario Game (3-Hour Rapid Prototype)**

1. Role: Solo Game Designer & Developer | Engine: Unreal Engine 5
2. Gameplay Mechanics: Engineered a high-difficulty 3D platforming system featuring tight jump windows and gravity-based movement physics within a 180-minute development window.
3. Pacing & Flow: Utilized a "trial-and-error" design philosophy to create a fast-paced, punishing gameplay loop where every movement requires extreme precision.
4. System Design: Implemented a streamlined death-and-respawn framework with customized collision triggers for immediate level resets to maintain player engagement during high-difficulty sequences.

- **Project: Horicon Mor Game (Atmospheric Horror Prototype)**

1. Role: Solo Game Designer & Developer | Engine: Unreal Engine 5
2. Gameplay Mechanics: Engineered a dynamic camera system for toggling between immersive first-person and cinematic perspectives, while integrating diverse horror elements and randomized jump-scares to establish a consistent, high-tension atmosphere.
3. Pacing & Flow: Mastered low-light volumetric lighting and particle-based fire systems to drive player fear and environmental storytelling.
4. System Design: Engineered a comprehensive UI framework, including a fully functional main menu and an adaptive onboarding system that teaches movement (WASD/Jump) via real-time environmental triggers.

PROFESSIONAL EXPERIENCE

Multi-Disciplinary Leadership: Directing a team of 15+ specialists across three technical divisions: Game Development, VR/ArchViz (Construction), and Cinematic VFX.

Pipeline Architecture: Architected unified production workflows that allow seamless asset sharing between Unreal Engine (for Games/VR) and Post-Production tools (for Film), significantly reducing render times.

Steam Publications: Collaborated with multiple independent studios on the development and optimization of PC titles that are currently published and available on Steam.

Created **detailed Game Design Documents (GDDs)** and technical wikis to standardize gameplay logic and mechanics for team collaborations.

Game Testing & QA: Contributed to testing initiatives for major titles (**NetEase**).

Rockstar Games Selection: Previously selected for a testing role for GTA VI based on performance in community testing initiatives (I declined at the time due to academic commitments).

Technical Animation: 6+ years of experience in realistic 3D animation pipeline, specializing in motion editing using Blender and Unreal Engine. Produced cinematic content using DaVinci Resolve and After Effects have a good hand in all software's require for Game design, animation, game development related.

SKILLS DETAIL

GAME DESIGN & DEVELOPMENT

- **Experience:** 5+ years of specialized experience in **Unreal Engine 5** (transitioning from UE4), focusing on rapid prototyping, **Blueprints Visual Scripting**, and full-cycle game production.
- **Design & Mechanics:** Proven ability to design and script complex gameplay systems, including Inventory Management, **AI Behavior Trees**, **Combat Design**, and **Player Progression** loops.
- **Industry Collaboration:** Partnered with independent studios to optimize builds for the **Tokyo Game Show (TGS)** and contributed to technical alpha testing for AAA titles at **NetEase Games**.
- **Community Leadership:** Active mentor in the **Unreal Engine community**, frequently providing technical documentation and solving complex blueprint errors for junior developers.
- **Backend & Data:** Integrated **Supabase/SQL** and **Firebase** for managing user data, global leaderboards, and real-time inventory systems (Applied in custom Android Apps).
- **Documentation:** Expert in authoring **Game Design Documents (GDDs)**, creating technical flowcharts, and maintaining internal project wikis.
- **Programming & Tools:** **Python** (Automation), **C++** (Basic), and **Git/GitHub** (Version Control).
- **Production Management:** Proficient in **Jira** (Agile/Scrum), **Notion** (Documentation), and **Slack** for team coordination and sprint planning.

3D ENVIRONMENT & ASSET CREATION

- **Environment & Lighting:** Expert in building immersive, photorealistic worlds with a strong command of Lumen Global Illumination, Post-Process Volumes, and Environmental Storytelling.
- **Asset Pipeline:** Highly skilled in the full 3D pipeline: High-poly sculpting (ZBrush), Retopology, UV Unwrapping, and PBR Texturing using Blender and Substance Painter.
- **Optimization:** Deep understanding of real-time rendering constraints (LODs, Draw Calls, Nanite etc.) to ensure assets look high-quality while maintaining 60 FPS performance.

ANIMATION & MOTION CAPTURE

- **Hybrid Workflow:** Comprehensive knowledge of the full animation process, ranging from traditional Keyframe Animation to capturing, cleaning, and refining Motion Capture (Mocap) data.
- **Technical Implementation:** Proficient in setting up Animation Blueprints, State Machines, and Control Rigs in Unreal Engine to make animations interactive and responsive.
- **Next-Gen Tech:** Actively utilizing AI-driven Mocap workflows and motion synthesis tools to accelerate the animation pipeline while maintaining high standards of realism.
- **Novel R&D:** Designed and developed a custom AI-driven motion synthesis framework from scratch, capable of generating unique character animations in real-time based on player input.
- **Key Software:** Unreal Engine 5 (Sequencer & Control Rig), Blender, Marvelous Designer, DaVinci Resolve, Adobe After Effects.

INTERESTS & TRAITS

1. **Gameplay Innovation:** Passionate about designing system-driven gameplay mechanics and solving complex design challenges.
2. **Immersive Design:** Focused on creating realistic, atmospheric 3D worlds that utilize environmental storytelling to guide player experience.
3. **Pipeline Optimization:** Keen interest in improving development workflows and automation using Python and custom tools.
4. **Continuous Learning:** dedicated to mastering evolving game engine technologies and researching new rendering techniques.

EDUCATION

- B.Tech in Computer Science and Engineering Nutan Maharashtra Institute of Engineering and Technology (NMIET)
- Status: Currently in 1st Year

TECHNICAL TOOLKIT

- Game Engine: Unreal Engine 5 (Specialist), Unity (Baseline).
- 3D & Art: Blender, ZBrush, Substance Painter, Marvelous Designer, MetaHuman.
- VFX & Video: Niagara VFX, DaVinci Resolve, Adobe After Effects.
- Product & UI: Figma (UI/UX), Flutter, Dart, Git/GitHub.

SPECIALIZED EXPERTISE

- Platform Deployment: Experience shipping to iOS, Android, and PC.
- Extended Reality: VR/AR Game Development and Property Visualization.
- Production: Technical Flowcharts, GDD Authoring, and Team Lead Coordination.

INDEPENDENT MILESTONES

- Commercial Success: Independently designed and sold a high-fidelity 3D background environment to a multinational corporation for ₹5,00,000.
- Portfolio Volume: Developed and self-delivered 6 complete 3D games and 4 Android applications (including one social media platform).
- Early Career: Successfully managed third-party partner registrations and app marketing as a Field Executive at age 14, demonstrating long-term industry commitment.

Skills & Expertise (Game Development Focus)

- **Core Game Development** (1) Game Development (2) Game Engine Development (Multi-Platform: PC, Mobile, VR) Blueprint Scripting (3) Level Design & World Building (4) UI / UX Design for Games - VR Game Development (5) Game Modding (6) Gameplay Systems & Mechanics (7) QA Game Testing & Debugging.
- **Platforms & Application Development** (8) Multi-Platform Development (iOS, Android, Watch, TV) (9) Web Application Development & Software Engineering (10) E-Commerce Application Development (11) Social Media Application Development.
- **Design, Visualization & Media** (12) 2D & 3D Architectural Visualization (Homes, Gardens, Property & Society Layouts) (13) VR Property Development (14) Cinematic Choreography & Scriptwriting (15) Music Production (FL Studio).
- **Technical & System Skills** (16) Linux Operating System (17) Linux Terminal & Command Line (18) Cybersecurity (Foundational / Entry-Level)
- **Marketing & Distribution** (19) SEO (Search Engine Optimization) (20) Google Play Store App Listing & Optimization
- **Legal & Professional Knowledge** (21) Cyber Law (Degree in Progress) (22) Intellectual Property Protection (23) Trademark Registration (24) Trade Class Selection

Software, Tools & Technologies

Video Editing, Animation & VFX

- 1.DaVinci Resolve
- 2.Adobe After Effects
- 3.Wondershare Filmora
- 4.Adobe Flash (Versions 6–9)
- 5.Blender
- 6.Unreal Engine
- 7.Substance Painter (Material & Texture Design)
- 8.Marvelous Designer (Cloth & Material Design)
- 9.ZBrush (3D Sculpting)
- 10.Adobe Photoshop
- 11.MetaHuman (Character Design)
- 12.Niagara (VFX & Simulation)
- 13.Motion Capture (Animation)

Programming & Application Development

- 14.Flutter
- 15.Dart
- 16.C
- 17.C++ (AI-Assisted Scripting)
- 18.Python
- 19.HTML
- 20.CSS
- 21.Sass (Advanced CSS)

Database & IT Fundamentals

- 15.Database Management Systems (DBMS)
- 16.MS-CIT

Design, CAD & Engineering

- 17.CorelDRAW
- 18.Tinkercad (3D Design & 3D Printing)
- 19.Automobile Design & Development (Concept Level)

WEB, UI/UX & PLATFORM DEVELOPMENT

- 20.SCRATCH WEBSITE DEVELOPMENT
- 21.WORDPRESS WEB DEVELOPMENT
- 22.WIX WEB DEVELOPMENT
- 23.FIGMA (UI/UX DESIGN)

ADDITIONAL TECHNICAL SKILLS

- 24.FL STUDIO (MUSIC PRODUCTION)
- 25.CINEMATIC CHOREOGRAPHY & SCRIPTWRITING
- 26.LINUX OPERATING SYSTEM
- 27.LINUX TERMINAL & COMMAND LINE
- 28.SEO (SEARCH ENGINE OPTIMIZATION)
- 29.GOOGLE PLAY STORE APP LISTING & OPTIMIZATION
- 30.CYBERSECURITY (FOUNDATIONAL / ENTRY-LEVEL)

Independent Work Experience & Skills

- 1.Independently developed 6 complete 3D games, managing design, development, and final self-delivery.
- 1.Independently designed and developed 4 Android applications, including one social media application.
- 1.Created virtual short films independently, handling concept development, production, and post-processing.
- 1.Designed logos and successfully completed Trademark Registration, including identification of appropriate trade classes under Intellectual Property Protection (IPR).
- 1.Worked as a Field Executive in App Marketing, I Engage (Did) Many third-party partner registration, I Did This work at the age of 14 Year.
- 1.Independently sold a custom-designed background scene to a multinational company for ₹5 lakh through a mediator platform.
